SUMMARY

Software Developer specializing in React.js, Node.js, Python, FastApi and scalable REST APIs, with experience building and deploying end-to-end production-ready applications. Strong in authentication systems, API integrations, and performance optimization. Proven ability to debug critical issues, improve system reliability, and deliver high-quality features in Agile environments.

EDUCATION

B.E in Computer Science and Engineering, PPG Institute of Technology, Coimbatore,

CGPA: 6.7 / 10 Aug '21 — Jun '25

Higher Secondary, St. Antony Hr Sec School, Krishnagiri

Percentage: 70% Jun '19 — Mar '21

SKILLS

Languages: JavaScript (ES6+), Python

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Context API

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, FastAPI

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code, Netlify, Vercel

Concepts: REST Architecture, Authentication Systems, Responsive UI Design, API Integration, Postman testing

EXPERIENCE

Software Developer Intern

Company: V Net Technology

Coimbatore, India

Jul 2024 – Aug 2024

- Built and deployed scalable REST APIs using Node.js & Express, improving backend response efficiency by ~25%
- Diagnosed and fixed 15+ critical production bugs, increasing application stability and reducing failure rates
- Developed responsive React.js UI components, improving page load performance and user experience
- Collaborated in an Agile team, contributing to sprint delivery, code reviews, and Git-based workflows
- Assisted in deployment and release processes, ensuring smooth feature rollouts

Software Developer Intern

Company: CAP Digisoft Solutions Inc.

Coimbatore, India

Mar 2026 – Present

Projects

AI-Powered Library Management System

Technologies: React.js, Node.js, Express.js, MySQL, JWT, RESTful APIs, AI Integration, Full Stack Development

- Developed a full-stack AI-powered Library Management System with responsive UI and scalable backend architecture.
- Built REST APIs for book management, issue tracking, wishlist, and AI recommendation functionality.
- Implemented JWT authentication, modular backend structure, and reusable frontend components.
- Designed a modern dashboard UI with reading analytics, a PDF reader interface, and AI-based personalized recommendations.

PROJECT

AI Article Generator (Quick.ai)

Tech: React, Node.js, Express, AI API, Clerk Authentication

- Engineered a full-stack AI SaaS platform generating dynamic content via external APIs
- Designed RESTful backend services handling concurrent user requests efficiently
- Integrated secure authentication (Clerk) with protected user sessions
- Deployed on Vercel, handling environment configs and production optimization
- Improved API response handling with async logic, ensuring smooth UX under load

Full-Stack Grocery E-Commerce Application | (MERN Stack)

Tech: MERN Stack (MongoDB, Express, React, Node.js), Tailwind CSS

- Built a feature-rich e-commerce platform with product listing, cart, and order workflows
- Implemented JWT authentication & role-based access control for secure transactions
- Developed an Admin Dashboard to manage inventory and orders efficiently
- Optimized frontend state using Context API, improving rendering performance
- Designed scalable backend APIs supporting multiple user operations simultaneously

Gemini AI Clone - AI-Powered Web App | (React, Gemini API)

Tech: MERN Stack (MongoDB, Express, React, Node.js), Tailwind CSS

- Developed a real-time AI application integrating external APIs with async handling
- Implemented robust error handling and fallback mechanisms for API reliability
- Deployed on Netlify with secure environment variable management

Clueless Closet – AI-Powered Fashion Recommendation Platform, Full Stack Web Application

Technologies: React.js, Node.js, Express.js, MySQL, JWT, RESTful APIs, Figma, Full Stack Development

- Engineered a full-stack fashion platform to digitize wardrobe management and automate outfit planning
- Developed dynamic and reusable UI components using React.js, improving user interaction and responsiveness
- Built secure backend services with Node.js and Express.js, handling authentication, data processing, and API integration
- Designed normalized MySQL database schema for efficient data management of users, wardrobe items, and outfits
- Implemented JWT-based authentication system ensuring secure access control
- Created outfit builder module enabling users to mix and match clothing items dynamically
- Developed outfit scheduling feature to plan daily and weekly attire
- Integrated image upload functionality for wardrobe digitization
- Architected the system to support AI-driven recommendations and social/marketplace features

Languages

Tamil (Native), English (Intermediate), Malayalam (Intermediate)

CERTIFICATIONS

MySQL Certification , Learnz Development Hub

JavaScript Fundamentals,

React Hooks, Great Stack Certification

KEY ACHIEVEMENTS

- Built and deployed 3+ full-stack applications independently
- Strong expertise in API design, authentication, and scalable architectures
- Experience with production deployments (Vercel, Netlify)
- Proven ability to debug, optimize, and deliver features in Agile environments
